(Huawei Cloud)

## About me

Computer Engineering student at Chulalongkorn University with a strong foundation in programming and data structures. Interested in data management, technology, design thinking, and business solutions, with hands-on experience from collaborative projects.

## Work experience

### ★ 42 Bangkok Discovery Piscine

JUN 2023

Built my first personal website with HTML, CSS, JavaScript, and Tailwind CSS, gaining hands-on experience and receiving the “Popular Vote from tutor” award.

**Role:** Frontend Developer

**Technology Stack:** HTML, CSS, Tailwind CSS, JavaScript

### ★ Ready Set Run!

MAY 2024

Developed a Java game applying OOP principles, gaining hands-on experience in game logic, UI design, and structured programming.

**Role:** Game Designer, Java Programmer

**Technology Stack:** Java

### ★ 24<sup>th</sup> Larngear Camp Website

OCT 2024 – DEC 2024

Using Figma, developed UX/UI layouts and components for *24<sup>th</sup> Larngear Camp website*, including a dynamic homepage, character-based profile customization, and interactive collection features.

**Role:** UX/UI Designer

**Technology Stack:** Figma

### ★ Fly with Sigma Database System

SEP 2024 – APR 2025

Developed *Fly with Sigma*, a flight booking system for a database course project, featuring ER modeling and SQL-based design using PostgreSQL, pgAdmin, and Docker. Learned system design and team coordination through balanced collaboration.

**Role:** Database System Designer

**Technology Stack:** PostgreSQL, SQL, pgAdmin, Docker, MongoDB

### ★ 18<sup>th</sup> FE Camp Website

JAN 2025 – MAY 2025

Contributed to the backend of the 18th FE Camp Website, a full-featured platform for managing class schedules, user information, and camp-related functions. Responsible for designing Prisma schemas, building RESTful APIs (GET, POST, PATCH), and implementing challenging features such as password reset and user signup—gaining hands-on experience with JavaScript/TypeScript and backend–frontend integration.

**Role:** Backend Developer

**Technology Stack:** Next.js, PostgreSQL, Prisma, Docker, TablePlus, Postman
